

Kennebunk Pond's Watershed Conservation Project

Landscape your property!!! See what you can do...

"The Key to Improving Water Quality"

Before

After

***This site was completed in July 2006**

Special Points of Interest:

- YCSWCD can help with the landscape design, plant recommendations and any permits that are needed.
- The Kennebunk Pond Association has 47-hard working volunteers that have helped their neighbors (and the lake).
- Utilizing these volunteers could save you as much as \$1,500 and even more if you were to contract out the labor.
- Some projects can be completed totally with grant funds...others may require matching funds from the homeowner, around \$500.

2006 Project Highlights:

- 6 Soil Erosion Sites have been fixed- high and medium priority
- 1 Vegetative Buffer site has been completed

From top left, clockwise:
Sandy Larned, Tom Larned, Oscar Swensen, Bill Oster, Fred Day, Steve Cronin, Delia Day, Karen Cronin, Sally Oster, Sue Carrington, Connie Swensen, Dorothy Straughn, and Jean Duling

Kennebunk Pond Association's President hard at work

Tom Larned

If you are interested in planting your own lake friendly plants and wonder where you can get them, please check our website:

www.yorkswcd.org for our updated shrub sale list and ordering instructions.

Please contact Heather Dionne of YCSWCD for a consult (207) 324-0888 ext.214, or hdionne@yorkswcd.org. We can help improve the value of your property while improving Kennebunk Pond's water quality.

SAVE THE DATE FOR THE KENNEBUNK POND ASSOCIATION MEETING:
